PROJECTS

Tanvi Chandalia Portfolio

Created a professional portfolio website that showcases all my work, including company projects and personal development projects. It highlights my skills in front-end development, responsive design, and building real-world solutions using HTML, CSS, Bootstrap, and jQuery. The platform demonstrates my hands-on experience, project outcomes, and ability to deliver polished, user-focused web applications.

White Panther Bicycle

Designed and developed a modern, responsive website for White Panther Bicycle, a premium cycling brand based in Morbi. The website features a clean, user-friendly interface with detailed product specifications and brand storytelling. Integrated contact forms, location maps, and customer support features to enhance user engagement. Focused on creating a seamless browsing experience across all devices.

TechNest Solutions

Developed a responsive multi-page website template for IT services using HTML5, CSS3, Bootstrap 5, and JavaScript. The project features service showcases, industry sections, and lead-generation forms, with a clean, modern design that ensures scalability and ease of navigation. Focused on responsive layouts, intuitive navigation, and enhanced user experience, strengthening skills in frontend development and UI/UX design.
